## In this Issue:

Classes at the MACI village

Workshop with Telstra

Living Connection joins ADIA project for seniors

## Classes at the MACI village

Living Connected has begun fortnightly computer classes on Tuesday afternoons for residents of the Multicultural Aged-care Illawarra (MACI) village in Warrarong

## Workshop with Telstra

A very productive workshop was held on August 2 for some In-House Training on the Living Connected services for Telstra Store senior specialists. In return we were given information from Telstra on their products and services that would be appropriate for seniors.

## Living Connected joins ADIA project for seniors

The Australian Digital Inclusion Alliance (ADIA) met in Sydney this week and Living Connected has joined others providing similar services to ours in other parts of Australia. We formed a network to share ideas and experiences on the digital inclusion of seniors. <https://digitalinclusion.org.au/>
